Profile

A versatile Software Engineer based in Ireland, with a robust skillset in both frontend and backend development. I bring a wealth of experience in creating dynamic and user-friendly interfaces, as well as designing scalable backend systems. Nowadays my passion lies in data analysis, machine learning, and AI programming, which drives my continuous learning and innovation.

Frontend Expertise
- Proficient in iOS, Android, Unity3D, React, Node.js, HTML, CSS, and JavaScript
- Skilled in developing engaging and intuitive user interfaces

Backend Expertise
- Experienced in Node.js, Java, Go, Kubernetes, and AWS
- Competent in building and maintaining robust backend infrastructures

Data and AI Proficiency
- Deeply passionate about data exploration, machine learning, and AI programming
- Eager to leverage data analytics to drive business insights and decisions

Core Attributes
- Active, creative, and passionate with a keen eye for detail
- Honest and reliable, with a strong commitment to delivering high-quality work
- Dedicated to continuous learning and improvement
